Summary

Software Engineer with 2+ years building **large-scale web applications** at Walmart Global Tech, specializing in **React**, **TypeScript**, and **front-end architecture**. Experienced in **data-driven UI features**, security and access-governance tooling, and a published **design system / UI component library** with **500+ weekly downloads**. Deep focus on **accessibility (WAI-ARIA/WCAG)**, **client-side performance optimization**, **state management**, and **experimentation-ready front-end infrastructure**.

Work Experience

Walmart Global Tech

July 2024 – Present

Software Development Engineer II

Bengaluru, India

- **Security & Analytics Portal:** Architected and developed an internal analytics dashboard (**React**, **TypeScript**, **GraphQL**) with **Redux** state management, lazy-loaded modules, and **Axios** data fetching — enabling data-driven decision-making, reducing on-call reliance by **40%**, and cutting initial bundle load time by **~35%**.
- **Design System & Component Library:** Designed reusable, **accessible React components** and data-fetching patterns adopted across internal tooling — enforcing consistent **UI design patterns**, reducing duplication, and accelerating feature delivery across teams.
- **Automation & Infrastructure:** Automated data re-ingestion and audit workflows on **GCP** via **Java** and **Kafka**, eliminating **10–12 DevOps hrs/week** and reducing manual operations by **75%**.
- **Platform Scale:** Contributed to Walmart's catalog aggregation backend — reactive **Kafka** + **Cassandra** services handling high-throughput event streams with **35%** peak surge reduction monitored via **Grafana** observability.

Walmart Global Tech

May 2023 – June 2024

Software Development Engineer Intern

Bengaluru, India

- **User-Facing Dashboard:** Built a returns lifecycle tracking dashboard (**React**, **GraphQL**, **Axios**) with real-time order status UI, **Redux** state management, and **user behavior tracking** — cutting ticket resolution time by **~30%** through iterative UX improvements.
- **Developer Platform & IAM:** Built dependency management tooling and secure **CI/CD** identity key generation for Walmart's internal platform, improving **access governance** and **security** workflows.
- **Security Gateway:** Architected a **Java Spring Boot** gateway filter enforcing **authorization policies** for sensitive internal APIs, preventing unauthorized downstream access — directly supporting **risk management** and **privileged access management**.

Zeko (formerly Qricle)

January 2023 – March 2023

Frontend Development Intern

Remote

- Developed **SEO-optimized**, large-scale web apps and admin dashboard with **Next.js SSR**, building responsive, **accessible** UI components and improving **Core Web Vitals** and **client-side performance** across devices.

Education

Indian Institute of Information Technology, Lucknow

2020 – 2024

Bachelor of Technology in Information Technology

CGPA: **8.6/10**

Skills

Frontend & UI: React, TypeScript, JavaScript, Next.js, HTML, CSS, GraphQL, Redux, Axios, Tailwind CSS, Storybook, CSS Custom Properties, WAI-ARIA, WCAG Accessibility, Core Web Vitals, Client-Side Performance Optimization

Build & Testing: Vite, Webpack, Jest, React Testing Library, CI/CD, Git, A/B Testing Infrastructure

Backend & Infra: Node.js, Java, Spring Boot, C++, Python, Apache Kafka, Cassandra, PostgreSQL, Redis, Docker, Kubernetes, GCP, AWS

Architecture: Front-End Architecture, Component Architecture, Design Systems, State Management, SSR/SSG, Micro-Frontends, Data-Driven UI, Experimentation Infrastructure, Event-Driven Architecture, System Design, Observability

Certifications

Google AI Fundamentals – Google | AWS Cloud Technical Essentials – Amazon | Working with BigQuery – Coursera | Question Reality: Cosmos – Coursera

Open Source & Projects

Tokis – Open Source Design System & React Component Library

2026

- Built and maintain a **zero-runtime**, **token-based React UI component library** on npm with **500+ weekly downloads** — **accessible WAI-ARIA** components, **CSS custom properties** theming, **tree-shakeable bundle** via modern **build tooling**, **composable API** with full **TypeScript** support, documented via **Storybook**.

Self-Hosted Streaming Platform

2025

- Deployed a containerized streaming platform using **Docker** with encrypted remote access via **Cloudflare Tunnels**, implementing a **zero-trust security architecture** with no exposed network ports.

Achievements

Google Summer of Code 2022 Contributor (ScoreLabs) | Codeforces **Specialist (1411)** | CodeChef **4-Star** | **Rank 7**, Codeforces Round 826 | **Hacktoberfest Maintainer** (Internet Archive, Appwrite, CircuitVerse)
