Summary

Full Stack Software Engineer (SDE II) with 2+ years at Walmart Global Tech building large-scale, user-facing systems end-to-end — production **React/TypeScript/JavaScript** front-ends to high-throughput **Java/Kafka/Cassandra** back-ends serving millions of users. Published open-source React library (**500+ weekly downloads**). Strong in **DSA** (Codeforces Specialist 1411), **system design**, **distributed computing**, and **cloud infrastructure** on **GCP**. GSoC 2022 contributor.

Work Experience

Walmart Global Tech

July 2024 – Present

Software Development Engineer II

Bengaluru, India

- **Full-Stack Analytics Platform:** Designed and built an internal analytics dashboard (**React, TypeScript, GraphQL, Node.js, Redux**) with lazy-loaded modules, code-splitting, and **Axios** data fetching — reducing on-call engineer dependency by **40%** and cutting initial bundle size by **~35%**.
- **Distributed Data Pipeline:** Core contributor to Walmart's catalog aggregation backend — a reactive **Java Spring Boot + Apache Kafka + Cassandra** pipeline processing millions of events daily, serving fault-tolerant, high-availability product data across Walmart.com.
- **Reusable Component Architecture:** Designed a shared **React** component library and data-fetching contracts adopted across internal tooling teams, enforcing consistent UI patterns and accelerating feature delivery.
- **Infrastructure Automation:** Automated bulk data re-ingestion and audit validation on **GCP** via **Java** and **Kafka**, eliminating **10–12 DevOps hrs/week** and reducing manual operations by **75%**.
- **System Resilience:** Implemented **adaptive rate limiting** and backpressure control on event streams; built a reusable **Kafka** producer framework with retry policies and **dead-letter queues (DLQs)**, achieving **35%** peak surge reduction monitored via **Grafana** dashboards.

Walmart Global Tech

May 2023 – June 2024

Software Development Engineer Intern

Bengaluru, India

- **Returns Lifecycle Dashboard:** Built a returns order tracking UI (**React, GraphQL, Node.js, Redux**) with real-time status updates, cutting ticket resolution time by **~30%**.
- **Platform Security:** Built dependency management tooling and secure **CI/CD** identity key generation for Walmart's internal developer platform, improving access governance.
- **Authorization Gateway:** Architected a **Java Spring Boot** gateway filter enforcing strict **authorization policies** for sensitive internal APIs, preventing unauthorized downstream access.

Zeko (formerly Qricle)

January 2023 – March 2023

Frontend Development Intern

Remote

- Built **SEO-optimized, accessible** web apps and admin dashboards with **Next.js SSR/SSG**, improving **Core Web Vitals** and delivering responsive, **WCAG-compliant** UI components.

Education

Indian Institute of Information Technology, Lucknow

2020 – 2024

Bachelor of Technology in Information Technology

CGPA: **8.6/10**

Skills

Languages: Java, JavaScript, TypeScript, Python, C++, HTML, CSS, SQL

Frontend: React, Next.js, Redux, GraphQL, Axios, Tailwind CSS, Vite, Webpack, Jest, Testing Library, Storybook, WAI-ARIA, Core Web Vitals

Backend & Data: Spring Boot, Node.js, REST APIs, Apache Kafka, Cassandra, PostgreSQL, Redis

DevOps & Cloud: GCP, AWS, Docker, Kubernetes, CI/CD, Git, Prometheus, Grafana, Cloudflare

Concepts: Full Stack Architecture, Distributed Systems, Event-Driven Architecture, SSR/SSG, Microservices, System Design, Large-Scale Data Processing, Accessibility (WCAG), Performance Optimization, Observability

Certifications

Google AI Fundamentals – Google | **AWS Cloud Technical Essentials** – Amazon | **Working with BigQuery** – Coursera | **Question Reality: Cosmos** – Coursera

Open Source & Projects

Tokis – Open Source React Component Library

2026

- Built and published a **zero-runtime, token-based React UI library** on npm (**500+ weekly downloads**) — **WAI-ARIA** accessible components, **CSS custom properties** theming, tree-shakeable bundle, composable API with full **TypeScript** support, documented via **Storybook**.

Self-Hosted Cloud Platform

2025

- Deployed a containerized streaming and storage platform (**Docker, Cloudflare Tunnels**) with **zero-trust** encrypted remote access and no exposed network ports.

Drone Development and Data Classification (Patent Pending)

2022 – 2023

- Led a **government-funded** research project (Ministry of Science & Technology) — open-source drone platform for agricultural **ML** data analysis with web dashboard integration.

Achievements

Google Summer of Code 2022 Contributor (ScoreLabs) | **7 Skill Badges** – Google Developers Platform | **Codeforces Specialist (1411)** | **CodeChef 4-Star** | **Rank 7**, Codeforces Round 826 | **Innovator Award** – Hack-o-Fiesta, IIIT-Lucknow | **Hacktoberfest Maintainer** (Internet Archive, Appwrite, CircuitVerse)
