## Summary

Full Stack Engineer (SDE II) with 2+ years at Walmart Global Tech delivering end-to-end systems — production **React/TypeScript** UIs to high-throughput **Java/Kafka/Cassandra** backends. Published open-source React library with **500+ weekly downloads**. Strong in **component architecture**, **REST/GraphQL APIs**, **event-driven microservices**, **SSR/SSG**, and **cloud infrastructure** on GCP/AWS.

## Work Experience

### Walmart Global Tech

July 2024 – Present

*Software Development Engineer II*

Bengaluru, India

- **Full-Stack Analytics Dashboard:** Built an internal analytics platform (**React, TypeScript, GraphQL, Node.js, Redux**) with lazy-loaded modules and Axios data fetching — reducing on-call reliance by **40%** and cutting initial bundle load time by **~35%**.
- **UI Architecture:** Designed a reusable **React** component library and data-fetching patterns adopted across internal tooling, enforcing consistent UI contracts and accelerating feature delivery.
- **Backend Platform:** Core contributor to Walmart's catalog aggregation backend (IRO & Rollups) — reactive **Apache Kafka + Cassandra** pipeline serving fault-tolerant, high-availability product data across Walmart.com.
- **Automation:** Automated data re-ingestion and audit table validation on **GCP** via **Java** and **Kafka**, eliminating **10–12 DevOps hrs/week** and reducing manual operations by **75%**.
- **Performance:** Implemented **adaptive rate limiting** and backpressure control on event streams; designed a reusable **Kafka** producer framework with retry policies and **DLQs**, achieving **35%** peak surge reduction monitored via **Grafana**.

### Walmart Global Tech

May 2023 – June 2024

*Software Development Engineer Intern*

Bengaluru, India

- **Returns Dashboard:** Built a returns lifecycle tracking dashboard (**React, GraphQL, Node.js, Redux**) with real-time order status UI, cutting ticket resolution time by **~30%**.
- **Developer Platform:** Built dependency management tooling and secure **CI/CD** identity key generation for Walmart's internal platform, improving access governance and security posture.
- **Security:** Architected a **Java Spring Boot** gateway filter enforcing **authorization policies** for sensitive internal APIs, preventing unauthorized downstream access.

### Zeko (formerly Qricle)

January 2023 – March 2023

*Frontend Development Intern*

Remote

- Developed **SEO-optimized** web apps and admin dashboard with **Next.js SSR**, building responsive, accessible UI components and improving **Core Web Vitals** across devices.

## Education

### Indian Institute of Information Technology, Lucknow

2020 – 2024

Bachelor of Technology in Information Technology

CGPA: **8.6/10**

## Skills

**Frontend:** React, Next.js, TypeScript, JavaScript, HTML/CSS, Redux, GraphQL, Axios, Tailwind CSS, Vite, Webpack, Jest, Testing Library, Storybook, WAI-ARIA, Core Web Vitals

**Backend:** Java, Spring Boot, Node.js, REST APIs, Apache Kafka, Cassandra, PostgreSQL, Redis, Python, C++

**DevOps & Infra:** Docker, GCP, AWS, Kubernetes, CI/CD, Git, Prometheus, Grafana, Cloudflare

**Concepts:** Full Stack Architecture, SSR/SSG, Microservices, Event-Driven Architecture, System Design, Component Architecture, Accessibility (WCAG), Performance Optimization, Observability, Fault Tolerance

## Certifications

Google AI Fundamentals – Google | AWS Cloud Technical Essentials – Amazon | Working with BigQuery – Coursera | Question Reality: Cosmos – Coursera

## Open Source & Projects

### Tokis – Open Source React Component Library

2026

- Built and published a **zero-runtime, token-based React UI library** on npm with **500+ weekly downloads** — accessible **WAI-ARIA** components, **CSS custom properties** theming, tree-shakeable bundle, composable API with full **TypeScript** support documented via **Storybook**.

### Self-Hosted Streaming Platform

2025

- Deployed a full-stack containerized streaming platform using **Docker** with encrypted remote access via **Cloudflare Tunnels**, implementing a **zero-trust architecture** with no exposed network ports.

### Drone Development and Data Classification (Patent Pending)

2022 – 2023

- Led a **government-funded** project for India's Ministry of Science and Technology, developing an open-source drone platform for agricultural **ML** data analysis.

## Achievements

Google Summer of Code 2022 Contributor (ScoreLabs) | **7 Skill Badges** – Google Developers Platform | Codeforces Specialist (1411) | CodeChef 4-Star | **Rank 7**, Codeforces Round 826 | **Innovator Award** – Hack-o-Fiesta, IIIT-Lucknow | **Hacktoberfest Maintainer** (Internet Archive, Appwrite, CircuitVerse)
